

Matt Ray

PROFESSIONAL EXPERIENCE

Rowe Group LLC / Harlingen, TX - Full Stack Software Engineer

OCT 2023 - MAR 2025

Rowe Group is a full-service marketing agency and managed IT service provider.

- Developed and maintained web applications using C#, .NET, and ASP.NET to streamline business operations and enhance user experience.
- Integrated PHP-based back-end systems for seamless cross-platform functionality and enhanced scalability.
- Managed over 250 PHP-based websites, integrating them with our large C# backend to handle API calls.

Technologies Used: C#, .NET, ASP.NET, SQL Server, MySQL, PHP, NodeJS, CMS (multiple), Full IT (6 Self Hosted Rackmount Servers)

Contract Work / Austin, TX - Full Stack Software Engineer

JUL 2022 - MAR 2023

Various contract work.

- Architected, developed, and provided comprehensive support for software solutions designed for seamless scalability, tailored to meet the specific needs of clients.
- Ensured the highest level of product quality by conducting thorough code reviews, implementing continuous testing strategies, analyzing user feedback, and effectively managing software integration processes.

Technologies Used: MySQL, Ruby (Rails), AWS, NodeJS, JavaScript, Docker, HTML/CSS, Angular, React

Webstop / Palm Harbor, FL - Full Stack Software Engineer

NOV 2021 - JUNE 2022

Webstop, located in the Tampa Bay area of Florida, has been developing and maintaining advanced grocery websites since 1996.

- Conducted thorough refactoring and optimization of existing Ruby on Rails applications and RDS SQL databases, improving their performance and efficiency.
- Played a key role in maintaining the stability of the front end to backend connection, ensuring smooth and uninterrupted operation of the application.
- Performed rigorous testing procedures to guarantee optimal performance of the application, addressing any performance bottlenecks and enhancing overall user experience.

- Demonstrated leadership potential by actively transitioning into the role of lead developer for a new Ruby on Rails application, which involved migrating from an outdated monolithic architecture.

Technologies Used: MySQL, MSSQL, Ruby (Rails), JavaScript, AWS EC2/S3/RDS, NodeJS

SourceDay Inc. / Austin, TX – Full Stack Software Engineer

MAR 2018 - MAY 2021

SourceDay Inc. is an early stage startup dealing with automating supply chain management.

- Developed a brand new RFQ (Request for Quote) App, taking charge of both the frontend and backend development. Collaborated with a Senior Developer for occasional guidance and received direct assistance from QA.
- Engaged in direct communication with clients to successfully integrate 2-way ETL (Extract, Transform, Load) processes with custom ERP systems, leveraging AWS Cloud Infrastructure.
- Demonstrated expertise in building, scaling, and optimizing Ruby on Rails and C# applications, creating an iPaaS (Integration Platform as a Service) equivalent for seamless integrations.
- Implemented scalable web systems and designed fault-tolerant architectures, incorporating various design patterns to support multi-tenant environments.
- Ensured data accuracy and consistency through the implementation of techniques such as data succinctness and drift correction.

Technologies Used: MySQL, Ruby (Rails), JavaScript, Linux (Env Configs, etc), IIS, AWS StepFunctions/EC2/Lambda/S3/RDS, NodeJS, Papertrail, Elastic Search

EDUCATION

Texas State University – Dual Major CS/Math Degree

2013 - 2017, San Marcos, TX
